

GenCanna and the  
Association for the Cannabinoid Industry (ACI)

## ACI NOVEL FOODS CONSORTIUM

As of July 23, 2020, GenCanna has joined the Association for the Cannabinoid Industry (ACI). In addition to joining, GenCanna has committed to ACI Novel Foods Consortium as a contributor for Crystalline Cannabidiol (CBD Isolate) and Broad-Spectrum Distillate.

GenCanna has increased its commitment to the ACI Novel Foods Consortium and is providing additional, required capital to demonstrate our commitment to regulatory compliance and product safety.

We understand it is imperative that international borders not impede GenCanna's unwavering dedication to providing access to quality hemp-derived cannabinoids for those in need.

### LOOKING AHEAD

In addition to the Novel Foods Consortium, GenCanna will be submitting a secondary products Novel Foods application for the authorization of Broad-Spectrum Liquid Emulsions and Water-Soluble CBD and Broad-Spectrum Powders.
