

FRUIT CHEWS

Why compete in a crowded market with yet another “me-too” CBD gummy? Set your brand apart by offering GenCanna’s all-natural, plant-based, premium Fruit Chews. They combine high-quality CBD Isolate with natural flavors and colors and no artificial ingredients.

We mastered the process of masking CBD’s bitter flavor, incorporating our cannabinoid ingredients into a scrumptious, stable, natural fruit chew with great taste and texture.

While our standard white label offering is a great starting point, private label customization is available with differentiating factors that include custom molds, cannabinoid concentrations and profiles.
