

# BROAD-SPECTRUM DISTILLATES

<b>PURITY</b>
<b>76-94% CBD</b>
<b>THC: PRODUCT SPECIFIC</b>

GenCanna's broad-spectrum distillates contain considerable levels of cannabinoids and specified THC levels, prepared through either chromatographic separation, and/or distillation depending on the product specifications.

Clarity in this ingredient's THC specification is extremely important. The marketplace is littered with mislabeled THC-containing distillates and broad-spectrum products, leaving your company open to undue risk from a regulatory and consumer perspective. Our distillate specifications are well defined — we do not hide THC or CBN levels behind poor analytics or sleight of hand.

## SPECIFICATIONS

APPEARANCE	CONSISTENCY	FLAVOR	ODOR
Medium-to-dark amber	Viscous oily liquid; can recrystallize at room temperature	Bitter, terpenoid, earthy	Hemp, earthy, terpenoid
SOLUBILITY	DERIVED FROM	COMPOSITION	SHELF LIFE

---

## DISTILLATE TYPES

Multiple distillate types ensure your ability to invent, infuse and be compliant, regardless of application type or geography. To incorporate these distillates into finished goods, give us a call to explore our flexible white and private label programs.

### Broad-Spectrum Tier 1

This is your basic, “go-to” broad-spectrum distillate solution for direct use or incorporation into finished goods. This distillate is an excellent ingredient for a more natural brand ethos, without true full-spectrum THC levels. THC: <0.1%.

### Broad-Spectrum Tier 2

This distillate was specifically created to ensure that minor cannabinoids are less likely to be washed out in a finished goods application — an excellent solution to the problem of dilution!

Our expert product development team will collaborate with you to ensure that your finished product specifications are well-defined. In the case that a custom distillate solution is required, GenCanna is the industry leader in developing product differentiation through unique formulation. THC: <0.1%.

### UK-Compliant Broad-Spectrum Distillate

GenCanna’s UK broad-spectrum distillate meets Novel Foods requirements and regulatory mandated UK THC limits at <0.01%.
